VIJAYA KUMAR L

Lead – Application Engineering | Web Platforms & Infrastructure | Automation & AI Workflows | Application Security (VAPT) | Technical SEO & Growth | Digital Marketing Executive

Bengaluru, Karnataka| **+91 89041 97200** | **risewithvj@gmail.com** | **linkedin.com/in/vijayakumarl** | **github.com/risewithvj**

PROFILE SUMMARY

Lead Application Engineer with 7+ years of hands-on experience building and running full-stack web platforms end-to-end - frontend, backend, hosting, DNS/SSL, security, chatbot, and CRM for a multi-brand HR services group. Independently owns development, DevOps/infrastructure (AWS, Cloudflare, cPanel/WHM), application security (VAPT and CVE remediation), automation (n8n, Zoho, custom chatbots), and technical SEO across five live production platforms plus several internal AI/automation applications. Self-taught engineer who built this skill set through real production work.

PLATFORMS BUILT & MANAGED - FROM SCRATCH

- **CIEL HR (cielhr.com) -** Lead Developer & Digital Architect - PHP, WordPress, Cloudflare, Zoho, AWS
- **CIEL Rapid (cielrapid.ai) -** Web Developer - WordPress, Elementor, Cloudflare
- **CIEL Skills & Careers -** Web Developer - WordPress, GA4, GSC, Cloudflare
- **Courseplay.ai -** Architecture & Automation Lead - n8n, Zoho SalesIQ, CRM, System Architecture
- **hfactor.digital -** Lead Developer - React, Supabase, PHP, Web Chatbot, CRM
- **Ma Foi Business Consulting -** Platform Owner (Audit, Recovery, PHP Backend) - PHP, WordPress, cPanel, Cloudflare

Each platform above was built completely from scratch - frontend, backend, hosting, DNS/SSL, security, web chatbot, and CRM integration.

CORE SKILLS

- **Web Development:** WordPress, PHP, Joomla, Elementor, HTML/CSS/JavaScript, React, TypeScript, custom plugin and theme development, responsive/mobile-first builds
- **Hosting & Server Admin:** cPanel/WHM, Nginx, AWS (EC2, S3), Docker, Cloudflare (WAF, CDN, DNS, SSL), Hostinger, Ubuntu/Linux server hardening
- **Databases & Backend:** PostgreSQL, MySQL, Supabase, NeonDB, SQLite-to-PostgreSQL migrations, database performance tuning and backups
- **Security / VAPT:** Vulnerability assessment and remediation, CVE triage and patching, session/auth hardening, security advisories, third-party VAPT report remediation, firewall and DDoS policy
- **Automation & AI:** n8n workflow automation, Slangflow, Zoho SalesIQ/CRM/Desk integrations, custom chatbot builds (web and WhatsApp), webhook-based real-time lead routing, Google Apps Script, Python automation
- **Technical SEO & Analytics:** AEO/GEO strategy, schema markup (JSON-LD), Core Web Vitals, WebP optimization, Google Tag Manager, GA4/GSC, sitemap and crawl-error resolution, 390+ SEO landing pages shipped
- **Network & Systems:** VPN configuration, DNS/SSL management, TrueNAS (Scale/Core), Microsoft 365 admin, GitHub repository management

PROFESSIONAL EXPERIENCE

Lead – Application Engineering | CIEL HR

Mar 2026 – Present

Own end-to-end technical architecture and delivery for a multi-brand portfolio: cielhr.com, Courseplay.ai, mafoibusinessconsulting.com (Ma Foi), cielskillsandcareers.com, and cielrapid.ai.

Security & Vulnerability Remediation (VAPT)

- Remediated a third-party VAPT report on the PSP Agent X application (initially graded "Inadequate") - fixed privilege escalation, session fixation, and exposed-port findings; configured subdomain hosting with Nginx + SSL and later resolved a production Nginx crash on the same app.
- Conducted internal VAPT / security assessments on additional confidential applications - including KPR.AI and Vibrant Screen - under NDA; specific findings are not disclosed here in line with confidentiality obligations.
- Triaged and issued an internal security advisory for a high-severity CVE (CVE-2026-24049, CVSS 7.1) in a Python wheel dependency shared across group applications, and separately tracked a related high-severity wheel-package CVE affecting builds 0.40.0 and above.
- Fixed a login/session-management vulnerability (no cache control, unauthenticated account access) found in the Smart CLM application; also migrated its database from SQLite to a standard SQL setup.

Infrastructure, Hosting & Migrations

- Set up Docker + n8n on AWS to host internal automation workflows; migrated the Payroll Automation application's database from NeonDB to a local PostgreSQL instance with a documented, zero-loss migration process, plus RDP server hosting/config.
- Owned mafoibusinessconsulting.com after inheriting it: ran a full site audit and backup, recovered the original theme file/license from the previous vendor, and fixed a critical high-CPU hosting incident (100% usage crashing the site) caused by repeated SQL queries.
- Diagnosed and resolved a recurring mailbox-size warning and multiple domain/email issues (auto-renewal, pausing inactive mailboxes) for the Ma Foi domain portfolio.
- Ran ongoing plugin/security patch cycles across CIEL HR, CIEL Rapid, and related sites (Elementor, WooCommerce, Rank Math, Yoast, WP Forms, security plugins, etc.) without production downtime - typically 10 to 14 plugins per cycle.
- Resolved recurring platform incidents: slow page loads (server-side fix), sitemap failures (cache/theme conflict), 404 handling on CIEL Rapid (auto-redirect to home), and a spam-flagged inbound phone line blocking incoming calls.

Automation, Chatbots & Lead Intelligence

- Built a webhook notification bot that routes SEO-form leads from the website directly to the sales team in Google Workspace in real time; extended lead tracking to a centralized dashboard covering website header forms, web-chat SEO leads, franchise leads, and CIEL Rapid leads.
- Built and connected a WhatsApp chatbot leads-automation pipeline to a live tracking sheet, and built/deployed new web chatbots for CIEL HR and CIEL Rapid.
- Fixed a mobile UX issue where the chatbot popup interrupted new visitors - disabled it on mobile and added a 1-minute engagement timer before it appears.
- Built a custom webhook and real-time notification dashboard for CIEL Rapid's chatbot since Zoho SalesIQ had no native reporting for it.

Website Delivery, Content Systems & SEO

- Migrated 465+ CIEL Rapid blog posts to the new site and cleared 3,000+ spam comments that were crashing the site's database, then disabled the vulnerable comment system group-wide.
- Shipped multiple product landing pages end-to-end (design, build, SEO): Learning Management System, Learning Experience Platform, Performance Management System, CLIP, Book-a-Demo, Pricing, Press Release, Media Coverage, Contact Us, and industry pages (e.g. Cleantech) - several fully custom-built and SEO-optimized on both desktop and mobile.
- Took CIEL Skills & Careers live end-to-end: coordinated domain access, pointed nameservers to Cloudflare, hosted and launched the site.
- Automated recurring content operations: daily Media Coverage updates, Press Release and Research Report publishing with UTM tracking and auto-reply subscription flows, and restored/rebuilt lost landing pages (e.g. BambooBox newsletter campaign).
- Installed Google Tag Manager on cielhr.com and audited/reviewed a 13,000+ link backlinking campaign with the SEO vendor to diagnose a traffic gap.
- Fixed numerous site-wide issues on request from stakeholders: broken footer/glossary/sitemap links, missing header menus, a broken brochure link, a broken team-page redirect, missing Privacy Policy footer link and PDF-to-page conversion, and CIEL HR Brands/Group Companies page updates.

Cross-Functional & Process Work

- Reviewed vendor deliverables (data validation rules, Excel workbook automation) and coordinated with cross-functional teams (Marketing, Finance, IT) on recurring operational requests - invoicing, ticketing, certificate updates, and asset requests.
- Advised on server upgrade options (VM/VPS specs and pricing) for scaling cielhr.com beyond its current shared hosting environment.

Digital Marketing Executive | CIEL HR

Jul 2024 – Mar 2026

- Rebuilt cielhr.com end-to-end from scratch - frontend UI/UX, backend structure, hosting (WHM/cPanel/AWS) - and manually built 370+ SEO-optimized landing pages.
- Implemented AEO/GEO technical SEO strategy that drove 10,000+ crawl requests within 24 hours of deployment; managed schema markup, metadata, and internal linking at scale.
- Converted all live production media to WebP format without downtime or user disruption.
- Built a real-time lead notification pipeline: Zoho SalesIQ to Google Workspace to Slack/Hangouts, so sales received instant alerts on new web leads.
- Designed and implemented Cloudflare WAF, bot protection, and DDoS rules; managed SSL, DNS, and CDN/caching (Cloudflare + LiteSpeed) across the group's hosting environment.
- Built and managed Zoho CRM workflows, SalesIQ chatbots, Zoho Desk automation, and Exotel IVR call-routing systems.

IT Supervisor | Jumbotail Technologies Pvt Ltd (via TVS-E Electronics) *Jan 2023 – Jul 2024*

- Deployed by TVS-E Electronics to Jumbotail's partner site; managed enterprise IT infrastructure - network systems, servers, firewalls, and VPNs - supporting daily operations.
- Designed and built a TrueNAS-based (Scale/Core) storage server from scratch, supporting 100+ daily active users for over a year.
- Administered AWS storage buckets and Microsoft 365 Admin Center; ran regular risk assessments and vulnerability mitigation.
- Led onboarding/exit IT processes, vendor management, and cross-functional IT team coordination.

Service Engineer (NextGO & Avita) & Pan-India TSD Support | TVS-E Electronics *Apr 2022 – Jul 2024*

- Diagnosed and repaired hardware/software issues on NextGO and Avita product lines; provided remote Technical Support Desk assistance to engineers across India.
- Promoted internally and transitioned to the IT Supervisor role at partner site Jumbotail Technologies (above), taking on infrastructure ownership and advanced technical support.

Laptop/Desktop Engineer & Technical Support (Pan-India) | Airblue Services *Jan 2021 – Dec 2022*

- Provided hardware/software diagnostics and repair support across a Pan-India client base, minimizing downtime through fast, accurate troubleshooting.
- Reassembled and tested repaired systems; performed OS reinstalls, software fixes, and minor hardware upgrades to specification.

Founder & Managing Director | Tech Point Official *Concurrent*

- Founded and run an independent technology solutions venture providing IT infrastructure management and content/video production services to small business clients, alongside the core CIEL HR role.

OPEN SOURCE PROJECTS (GITHUB.COM/RISEWITHVJ)

- **IVR Calling Report Automation:** Free, open-source Google Sheets + Apps Script tool that turns raw Exotel IVR call exports into branded, auto-scheduled weekly/monthly email reports with an in-sheet dashboard - zero servers, zero cost, ~10 minute setup.
- **LeadFlow (Micro CRM):** Lightweight lead-management CRM built to solve scattered multi-source lead tracking (SEO forms, WhatsApp, web chat) across sales teams.
- **SnapURL - URL Shortener:** Full-stack URL shortener (React/Vite/TypeScript, Express, PostgreSQL via Drizzle ORM, Redis) with analytics, CSV import, JWT auth, and rate limiting; deployed on Vercel.

CERTIFICATIONS

- Claude Code in Action (AI & Agentic Workflows) - Anthropic
